Subject: CA systems that need arsenic COs

Hi Roberto and Claire,

I cut down the arsenic spreadsheet list to only the systems that we have recommended issuance of a compliance order based on the current facts. This includes LPA and District systems. I imagine this list will be much shorter by the end of December but there will still likely be some remaining. We need to decide how we want to approach all the systems EPA believes should have a compliance order but DDW/LPA has not acted.

29 systems are on the list. 4 are District systems and 25 LPA systems .
